

Integrates into existing infrastructures, Advanced Multi biometric capture, Touchless Fingerprint scanner, Document reader
Adaptable to all type of borders

Faster, Easy & Touchless Manual Border Control

CONTEXT

An Enhanced Experience for a Reliable Manual Border Control

The IN GROUPE Kit complies with the EU directives on biographic and biometric data capture, it enhances the overall traveler experience and it adapts to any existing or new configuration for Manual Border Control.

The kit includes a Totem with Integrated Cameras, a Document Reader and a Finger Prints scanner. It includes all you need to capture the required information by the EU directives on external borders and applying to TCNs control.

Provide to your border agents the flexibility to accomplish their tasks at the time they minimize the contact with the persons being controlled.

Solution Benefits

- ✓ **Faster Border Crossing:** Integrate to your manual control process the automated validation of ID documents and certificates for Health Passes and Schengen visas.
- ✓ **Secure Border Crossing:** a field proven solution helping to respect new health directives and reducing human contact to its minimum required.
- ✓ **Reliable Solution:** Combines IN GROUPE worldwide specialist of self sovereign biometric identity and partners on peripherals.
- ✓ **Flexible and Cost performant Solution:** it adapts to generic and specific EU border control processes. It requires low maintenance support and it can integrate a monitoring system.

- Face recognition device
- Advance antispoofing and liveness detection
