

Stellar™

SECURITY IN MOVEMENTS

Captivating light movement in security thread.

Disruptive and fascinating moving effect enhanced by dynamic colour changes

Stellar™ delivers counterintuitive multi-directional 3D motion effects using simple, culturally relevant images.

Stellar™ is built on robust, cutting-edge technology, it combines kinetic effects with optional PVD colour shift for rapid public authentication and design harmony across denominations.

Stellar™ combines a highly dynamic security feature with simple design for easy public education and rapid public authentication.

Stellar™ is very flexible in design, with attractive effects that harmonize with the global design of each banknote denomination and across a banknote series.

Stellar™ thread combines changing colour effects and dynamics with a wide choice of thread sizes; features and options.

- Multi directional eye-catching movement effects using simple symbols or any graphic designs.
- Affordable alternative to other dynamic motion-based security threads.
- Intuitive and rapid authentication by end user.
- Robust and durable for hard working denominations. Reliable and trusted technology.
- Customizable with colour shift for added visual layers

KEY FEATURES

PUBLIC AWARENESS

Eye-catching effects and rapid movement, which is intuitive, easy to explain and rapidly authenticated by the public.

DESIGN DIVERSITY

Offers a full range of effects that can be customised to your needs.

HIGHLY SECURED

Proven complex design and manufacturing technology. Can include multilevel security with cleartext, microtext, fluorescence and magnetic options including Mag³.
